All crimes are commercial and have a commercial value to them. It makes you look at improvements to the freeways, cities and towns in a different light ... especially when those improvements are funded by '*municipal bonds*.' You'll also understand why there's no hurry to end the war in Iraq.

All criminal prosecution is for the purpose for raising revenue for the United States. Now you'll have a better understanding of why people are in jail, why they are in prison, why they are on probation and why they are charged with everything from jaywalking on up through murder one.

An American soldier who dies in Afghanistan and Iraq probably carries a \$10 million life insurance on him carried by the government. After all, every soldier, marine, or air force person is an asset to the United States. They have a huge investment in that particular soldier and his activity and it can explain why it is that the US is not so anxious to withdraw its troops from that area. **It's a money making activity** and they don't want to talk about the fact that they are making money on death and that they are making money from the incarceration and imprisonment of many otherwise good hearted people who have not necessarily committed otherwise *serious* crimes.

They have a rule called the 144 holder. The rule is that they can't sell private investment securities that are not registered. The rule prohibits them from selling the prison bonds. They have to wait 6 months before they can sell a certain quantity of private securities without being registered, selling them as private securities.

Basically there are 8 people on the board of directors of CCA (Corrections Corporation of America) The top holders are **Joseph E. Russell** and **John M. Ferguson**. Russell owns 64,000 shares of CCA stock, which is worth about \$70 million. Ferguson owns 34,000 shares valued at about \$37 million.

*Fidelity Management and Research* is the top stock holder, the top investment firm that is selling the bonds as investment securities. They pool them and sell them as mortgage backed securities. Also when they pool them, they sell them as mutual funds on the stock market. By "pooling" we mean the **securities on the inmates**.

What they are doing is they are actually taking the mortgage backed securities, which are really bid bonds, performance bonds and payment bonds. They pool these bonds and when they pool them together they call them mortgage backed securities. They take these to TBA which is the *Bond Market Association*. It's an **actual market** for bonds. Anytime a bond is issued there has to be an underwriter. The bonds have to be underwritten. Bonds that are issued have to be indemnified so there has to be surety to indemnify the bonds. The brokerage houses and the insurance companies indemnify the bonds. They're called *surety companies*.

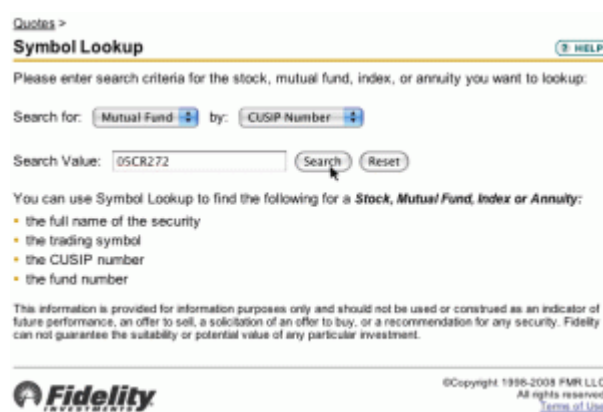

After the surety companies indemnify the bonds, which is underwriting them, they do this through an *investment banker* or *the banks themselves do this*. They job it out to them. They buy up all these shares and turn around and sell them as investment securities. The shares represent the stock which represent the account of CCA. All of this has been funneled through CCA, the Corrections Corporation of America.

**What they are doing is selling stock in the prison system by selling the prisoners' accounts as securities through the securities exchange.** They are making huge amounts of money off it. They privatize the prisoners' accounts and bring all these investors in and what they are doing is underwriting all these prisoner's accounts (bonds). This is after the surety company guarantees the bonds. Then they are underwritten through an investment bank or banker. Then they are put out on the market and resold to the public.

## CHECK IT YOURSELF

Enter any prisoner's case number within the specified entry boxes, located at [Fidelity Investments' online Securities look up index query](#), locate that prisoner's bonds and find out where they are being traded.

**Example** (with a court case number 05CR272 - this is the District Court Case Number):

To make it clear to whom you have the honor, take a look at the Fidelity Investments logos:

In other words **the banks are buying up all the shares and then they resell them as investment securities to the public.** The public then buys them as mutual funds or they can buy them as debt instruments, equity instruments.

What they are really doing is they are buying up debt instruments. They are using the fiscal accounting cycle of accrual and they sell the prisoner's 'capital and interest' as it is called in accrual accounting. They resell these to the public *because the prisoner did not do full settlement and closure on the account.*

They sell the prisoner accounts as a commercial dishonor and sell it to the public as a commercial dishonor.

When you go in the courts they always say they are operating under a statute jurisdiction. The Black's Law Dictionary 4th edition says a statute is *a bond or obligation of record*. **That's what all the criminal statutes are: bonds or obligation of record.** Go in and read the definition of a recognizance bond and you find that it is a bond or obligation of record. They are selling bonds. They are charging prisoners under a bond; the prisoner signs the bond and the bond becomes the agreement for the payback. **This is done when the prisoner signs the final court papers at a sentencing hearing.**

Just how many of us remember when our government attempted to finance from the private sector during the Second World War? Weren't they selling war bonds? They were soaking up the people's equity in terms of buying bonds, transferring your funds to the government. The government by purchasing those bonds, was promising to pay you back your investment at sometime in the future with interest. At that time what they were collecting from the people was their so-called cash equity. People have gotten too poor, too stingy, too smart to buy bonds to finance the government.

How long has it been since you heard the Post Office or anyone trying to get you down to buy US savings bonds? So what they are doing now instead of getting us to voluntarily give our cash equity to the government for a promise to be paid back in the future, they are securing from us

some violation of a statute by which the law ascribes from us a penalty; i.e., the payment of a sum of money due.

Instead of collecting the cash from us, they put us through a criminal procedure where we dishonor the system and what is happening is they are selling our capital and our interest. In other words, they are selling the liability you had in whatever charge was brought against your strawman.

They are taking that capital and interest that you should pay and are grabbing that from us and selling it on the open market to bankers and investors to transfer their funds to government which is covered by the bond of the violation of your strawman of that statute.

In order to secure the bond **the living soul is placed in prison as the surety to back the bond** which is financed on the investment of the public market place in terms of the sales of stocks and bonds.

The public doesn't directly bid on my (the prisoner's) debt. Your debt is assumed by the bankers. The bankers issue secondary paper that allows me to invest in what they are holding as the holder in due course of the claim against your strawman. The reason they are doing this is because you dishonored the post settlement procedures for settlement and closure of the account.

The prisoner should have come in and accepted and used his exemption. Since the prisoner dishonored the post settlement proceedings, then the prisoner is in dishonor and the issuance of the bonds by the financing system was done in order to pass the punishment on to him because of his inability to fulfill his post settlement objectives.

If you get into dishonor by nonacceptance, what they are trying to do is get an acceptor which is the same thing as **a banker**. They need someone to pay off the obligation and if you get into dishonor, they sell your dishonor and put you into prison as the collateral and they sell the bond.

The bond is issued and they get a surety to underwrite the bid bond with a performance bond and then they get an underwriter to underwrite the performance and payment bonds.

What the performance bond does is it guarantees the bid contract, or the bid bond. What the bid bond does is guarantee the payment of the performance bond. This is done through a surety company. Then they get an underwriter or an investment banker to underwrite it. After it's underwritten, they sell it to the public as investment securities, debt instruments, or mutual backed securities.

It's all done through bonds ... bonding. That's what all these municipal bonds are. What they doing is following everything through the prison system. **The prison system is being privatized.** Through privatization, private enterprise can fund the prison system cheaper than the government can. They are subsidizing everything through privatization.

The *American Legislative Exchange Council* (ALEC), promotes privatization through foundations like the *Reason Foundation* owned by **David Knott**. They get the foundations to promote this and get investors to come in.

*Cornell* was merged with *Trinity Venture Company* which is an investment company. What they did was change their name to *Reid Trinity Venture* and then merged with *SB Warburg*. **(Warburg was out of Germany and partnered with Rothschild.)** *SB Warburg* is in Chicago, Illinois, and they

merged with *BIF* in Switzerland, which is a settlement and closure bank, and the biggest bank in the world for settlements. They are connected to *Cornell Company* which is owned by **David Cornell**.

Everyone is tied in. *Paine Webber Group* in the United States and all the big international corporations are the stockholders and own all the stock in CCA. Everyone is using our exemptions on the private side. They filed a 1096 tax return and show it as a prepaid account, as prepaid interest and they returned it back to the prisoner. They took the prisoners deduction for the exemption and they deduct the tax and the IRS bills the prisoner for the tax. So the corporations are stealing your exemption which is your intellectual property.

What's wrong with this? They are not telling us what they are doing. It's all commercial. **When you go into the court room everything is commercial.**

What really matters here is honor and dishonor. The courts have to dishonor the potential prisoner or get that 'person' to argue or get that person's attorney to argue. Just like Martha Stewart. Argue and you're in dishonor and you'll end up in jail.

**The attorneys are actors to make us think the whole process is a factual issue.** They get us into the guilty/not guilty mode and they get into all the cloak and dagger or what evidence to present. **It's a dog and pony show to cover up that they are after the debt money.**

All corporations work on a fiscal accounting year which means that they spend debt. They can't get rid of the debt and balance the books unless they run it through our accounts on the private side.

We the people run on a calendar year and the corporations run on the fiscal year. *The only way that they can balance their books is to run it through our accounts using our exemptions.* Then they can do their reverse bookkeeping entry and go to post settlement and closure. They can't do that until the prisoners do the acceptance (if they do it).

That what they are looking for in the court room under UCC 3-410 is the acceptor. That means we are assuming the liability for the debt as the principal. A lot of times with debt the principal is always the primary libelant in the commercial setting. He has to assume the liability and then you get your remedy. Otherwise you don't get a remedy.

What they do is they sell the notes just as they do when you go into prison. They endorse the note and they no longer the holder of the note. The mortgage company wasn't involved in this process ... the attorneys are doing all this. What they are doing is coming to the private side to get the debt without any permission from the mortgage company. In this case they quoted from the UCC, and it's from *Lex Mercatoria*, the **Law of the Merchant**.

Admiralty is all debt and it's all civil; it becomes criminal when the prisoner gets a contempt charge when he refuses to pay. They can keep you in jail until you pay the debt. The initial get out of jail bond releases you until you've successfully paid the debt. Warden comes from admiralty-warden of the sea. The warden is the warehouse man who is warehousing all the goods; he's the bailee. The commitment order is your bailment, your contract for the commitment of the goods. Then they put the goods in a warehouse and store them there. **(Prisoners stored in prisons, just like the people stored in the pods in the movie, *The Matrix*.)**

This **fiction** (corporation) took **you** (John Henry Doe), the flesh and blood creation of God, out of the picture and substituted in your place something called the 'strawman' (JOHN HENRY DOE).

Whenever you get a summons to appear in court, your name is printed in all capital letters "JOHN HENRY DOE" *because that is how the 'straw man' is distinguished from the flesh and blood "John Henry Doe", God-created man.*

Since you show up and answer to your all-capital name (JOHN HENRY DOE) on the docket, the court accepts you (John Henry Doe) as the 'representative' of the straw man (JOHN HENRY DOE) and proceeds to play the game with you. If you don't show up, they will still arrest you for failure to appear, because the state has already recognized you as the representative of the straw man - unless you learn how to break that connection (called a '*nexus*') and take back your straw man from state 'ownership'.

It sounds complicated and you weren't told a thing about it in school (public school), but we did tell you it was a "deception", remember?

If you don't realize that you are 'owned' by the state, then consider this: whenever you go to a car dealer and buy a new car, the "deed" (from the manufacturer) of that car is sent by the car dealer to the Secretary of State of the state in which you live. It's recorded and then destroyed. You, in turn, are given a "title of certificate" by your state which says that you have a legal right to possess and use this car which is now "*owned by the state*" who received its deed. **"Your" ownership of the car is an "illusion,"** the reality is that the state owns the car.

Same for a marriage licence. You are asking the state to give you permission to become man and wife. By seeking out said marriage licence, *you are affirming to the state that you are **slaves of the state*** ("chattel") and *you recognize that the 'massah' has authority over you* for such things, **otherwise you wouldn't be asking for its 'permission'** in the first place.
