

Food for Thought -1

It is a fact that the local county and state courts are registered and traded through Dunn & Bradstreet under numerous corporate entity names, establishing the evidence in fact that they have voluntarily stepped down from their position of authority and now must do business on business terms.

Yet, to date, we have not found one that has registered with the Secretary of State to legally do business in the state as required by their laws and statutes.

So, a reasonable man might come to reason that we have numerous corporations, masquerading as courts, unlawfully claiming exempt status, as a court, for the purpose of evading taxes. Might he not?

Armed with documentary evidence of the criminal tax evasion,[easy enough to obtain], one might be able to mobilize the one 'agency' that all of the others fear!

Hmmmmm.....Just a thought!
